Dear EPO committee,

My name is Luis Maly. I am a multidisciplinary artist based in The Hague.

For the “Call for artists: paper transformation” I am proposing the project “The Artificial Intelligence lost paper method”. Complicated woodworking techniques will be employed to process the paper files into building material. Furthermore a part, of these processed paper files, will be transformed into bronze by appropriating the lost wax technique. Lastly together with a media artist, specialized in A.I. technology, we will analyze the data of all paper files and transform it into designs and sketches of the final sculpture with the help of digital technology.

Thank you for consideration.

Sincerely,

Luis Maly
